

## M5 by Zoomax 5" Full-Color Touch Video Magnifier

The new Zoomax M5 handheld video magnifier offers the perfect combination of compact size, easy-to-use features and superior image quality. With two HD cameras and an HD screen, the M5 produces a crystal clear image at any magnification level in any viewing mode.

Sleek and stylish, the M5's compact design combines the familiarity of tactile buttons with a simple touch screen interface. Use the tactile buttons for zooming in and out or taking a snapshot of what you're viewing; use the touch screen for browsing your saved images or changing the contrast mode. Switching viewing modes is easy too—just open the reading stand to automatically switch to reading mode, or close it to switch to distance mode.

Small enough to fit in your pocket or purse, the M5 is perfect for on-the-go use. The 5" HD screen offers a large viewing area, while the compact, lightweight design gives you the best features in one ultra-portable package. And when you're at home, connect the M5 to a TV or monitor through HDMI to use it like a desktop video magnifier! No other handheld video magnifier offers more versatility than the innovative Zoomax M5.
